Subject: RE: NWIRP/Grumman Groundwater Coordination Meeting-Please hold November 15-EPA NYC Office

Agreed Rich

We are hopeful that Lora can make it as there is a RAB meeting the next day. Our objective was to get a target date out there and hope that folks could work with the date. I think everyone is anxious to meet since it has been a while.

However, if November 15 does not work for the group then we will look for a date in December---a difficult month calendar wise for our large group.

Good suggestion to add action items to the agenda; we will do that.

Thanks

Doug

I'm available Doug - but if the Navy isn't - doesn't make much sense.

Agenda is real important. Perhaps the EPA can issue the draft agenda which identifies status of any action items that came out of the last meeting.

Thanks

Rich

Subject: NWIRP/Grumman Groundwater Coordination Meeting-Please hold November 15-EPA NYC Office

Hi

Last Thursday NYSDEC and NYSDOH met to discuss the Navy white paper on options for discharge of treated groundwater (attached); we are now in a position to schedule a coordination meeting. NYSDOH will participate in the meeting.

EPA, NYSDOH and NYSDEC have compared calendars and are available to meet on November 15.

We are hoping that you all can make yourself available to meet at the EPA offices in NYC on November 15 from 10:30-1:30. As you might expect calendars are quite busy and will only get worse the week after November 15 and won't improve until after the holidays.

An agenda, outlook meeting invite and room location will be provided within the next two weeks. If you have any suggestions for agenda topics please send them to Jim and me.

Hope you all will be able to make it.

Thanks

Doug

Subject: White paper on options for discharge of treated groundwater

Good Afternoon,

Attach is the white paper that was prepared in order to evaluate options for maximizing the use of Bethpage Water District (BWD) Well 6-2 to serve as both a public water supply and remediation well. This paper also evaluates potential options for the use or disposal of treated water from the sustained operation of BWD Well 6-2. R/

Lora Fly
